

# Challenging the Expectation of your Cleaning Products

Too many so-called green products sold in the marketplace simply don't work. It's a big challenge to deliver a product that is both safe and effective. Why? Because harmful chemicals used by national brands are often cheaper and easier to use.

We put a huge burden on ourselves to create 100% natural products that outperform national brands in the marketplace. We know that nature has effective solutions and we've made it our business to put them in your hand so you can experience the difference.

## Did you know?

- Studies show that some chemical ingredients used in cleaning products increase the risk of long-term health problems, such as cancer and asthma, as well as short-term health problems, such as headaches and skin irritation.
- Over 1,000,000 accidental poisonings occur each year in North America. Over 60% happen to children under the age of 6, with the greatest number of these poisonings caused from cleaning substances.
- Within 26 seconds after exposure to some of these cleaning products, traces of chemicals can be found in every organ in the body.
- Children exposed to toxic chemicals in household cleaning products may become more susceptible to cancers, later in life.
- Toxic chemicals in cleaning products can enter our bodies by absorption through the skin or through ingestion of household dust and chemical residues left on dishes and cutlery.
- When toxic cleaning products are flushed down the drain, they can have a serious impact on aquatic ecosystems.

The risk of chemical cross-contamination of food in a grocery store can have your apples tasting like soap? This issue impacts virtually all consumers; even *healthy consumers* who think they're reading labels and making smart shopping choices.

## Liquid Green Eco-superior Products

*Remarkably gentle yet powerful against dirt, grease, fat and oil*

Liquid Green products were developed with the consumer in mind. Be assured that when you clean with Liquid Green cleaners you are cleaning carcinogen-free and can confidently keep a healthy home environment for your kids and your pets. They depend on you to keep them safe.

All our cleaners are made from plant extracts and food material such as coconut, sugar cane, garlic, geranium, chrysanthemum, and other non-toxic and non-carcinogenic ingredients. They are:

- *100% Toxin-free*
